The Coronavirus

Everyone is talking about the Coronavirus.

The Coronavirus is a sickness. There are

sick people everywhere in the world.

People sick with Coronavirus have

1. a fever

2. a sore throat

3. a cough

4. can't breathe well

Children only get a little sick with the

Coronavirus. Children don't have to worry

about getting sick. Children are strong and

healthy.

If you do get sick, just rest and play at

home. You will get better.

Older people get more sick with the

Coronavirus. Many older people can stay

at home to get better, but some people

must go to hospital to get better.

We must all help to stop the Coronavirus.

The Coronavirus can go from sick people

to healthy people when they cough.

1. Stay at home so that you do not go

near people who are sick. That will

help you to not get the Coronavirus.

2. Wash your hands with soap and water,

or hand sanitiser, everywhere you go.

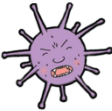

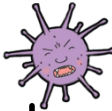

You will wash the Coronavirus away.

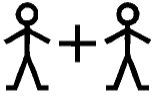

3.      Cough and sneeze into your elbow or

     into a tissue. Then, if you have the

  /   Coronavirus, you won't spread it to

 other people.

Together,

we will stop the Coronavirus.
